TECHNICAL SKILLS

Languages: Go, TypeScript, JavaScript, Python, Java, C, C++, PHP, SQL, Bash

Backend & Data: REST APIs, Node.js, Express, go-chi/chi, Firebase, Stripe, WebSockets, MySQL, Redis

Frontend: React, Vue.js, Nuxt 3, Tailwind CSS, HTML, CSS

Cloud & DevOps: AWS (S3), Google Cloud, Docker, Kubernetes, Helm, GitHub Actions, CI/CD, Git, Linux

EXPERIENCE

Software Developer | Go, Vue/Nuxt, PHP, Redis, AWS S3, Kubernetes

May 2026 – Aug 2026

Ontario Government – GovTechON

Toronto, ON

- Delivered full-stack features across a **Go backend, Nuxt/Vue frontend, and PHP CMS** for InsideOPS, an intranet serving **tens of thousands of public-service employees**.
- Migrated Go REST microservices from **Echo to go-chi/chi** and refactored media storage from MinIO to the **AWS S3 SDK** using dependency injection to decouple storage from business logic.
- Eliminated gateway timeouts with a **dedicated Redis instance for ABAC lookups**; fixed a duplicate-email race condition with an **atomic Redis claim** and concurrency tests.
- Closed a **SQL injection vulnerability** via parameterized queries; hardened media sharing and upload validation to enforce enterprise security boundaries.
- Moved logic from legacy PHP widgets into **Go endpoints and Vue components**; shipped via **Kubernetes/Helm/ArgoCD** GitOps with PR review and **AODA/WCAG-compliant** UI.

Founding Software Engineer | React, Node.js, TypeScript, Firebase, Stripe

Sep 2025 – Present

Vironix AI

Toronto, ON

- Architected core systems of an **AI-powered video analytics platform** with active users: React/TypeScript frontend, Node.js API, Firestore, and asynchronous worker processes.
- Designed the **async video-processing pipeline** (signed-URL uploads, retries, failure handling) integrating **Cloud Video Intelligence, AssemblyAI, and LLMs**.
- Built **credit-based metering** with cost estimation, **transactional** deduction, and **idempotent** refunds, plus **Stripe** subscriptions and webhook-driven account state.
- Added production safeguards (**rate limiting**, authorization, input validation) and **GitHub Actions CI/CD**; **interviewed 50+ engineering candidates** to help hire the team.

Freelance Software Engineer | Python, React, TypeScript, Selenium

Jan 2025 – Present

Independent Contractor

Toronto, ON

- Built a paid **Selenium/Twilio** course-seat monitor used by **20+ students** across **40+ courses** (**150+ SMS alerts, >90% success**) with session reuse, retries, and duplicate-alert suppression.
- Built a Python/**OpenAI GPT** listing-classification pipeline processing **500+ listings** per run at **>95% accuracy**, cutting candidates by **~40%**.
- Delivered booking websites for JTC Property Services (**50+ bookings** in 3 months, **99.9% uptime**) and Little Genius Island (React/TypeScript), streamlining lead intake and scheduling.

EDUCATION

Toronto Metropolitan University

Sep 2023 – Present

BSc, Computer Science, Co-op – Dean's List (2024, 2025)

Toronto, ON

- **Coursework:** Data Structures & Algorithms, Databases, Systems & Computer Architecture, Software Engineering
- **3rd Place**, Ontario Government OGT Summer 2026 Hackathon: built a full-stack TypeScript/React/Express AI knowledge-retrieval prototype with RBAC
