TECHNICAL SKILLS

Languages: Go, TypeScript, JavaScript, Python, Java, C, C++, PHP, SQL, Bash

Backend & Data: REST APIs, Node.js, Express, Firebase, Stripe, WebSockets, MySQL, Redis

Frontend: Vite, React, Vue.js, Nuxt, Tailwind CSS, HTML, CSS

Cloud & DevOps: AWS, Google Cloud, Docker, Kubernetes, CI/CD, GitHub Actions, Git, Linux

Security: Authentication, Authorization, RBAC, ABAC, SQL Injection Prevention, Input Validation

EXPERIENCE

Software Engineer | Go, Vue/Nuxt, PHP, Redis, AWS, Kubernetes

May 2026 – Present

Ontario Government – GovTechON

Toronto, ON

- Build and ship full-stack features across a **Go API, Nuxt/Vue frontend, and PHP CMS** on an intranet serving **tens of thousands of public-service employees**, owning work from backend to UI.
- Modernized backend services by migrating **Go microservices** to a cleaner framework and moving media storage from self-hosted infrastructure to **AWS**, using dependency injection to decouple storage from business logic.
- Fixed production **gateway timeouts** by isolating permission lookups on a **dedicated Redis cache**; eliminated duplicate emails from a race condition using an **atomic Redis lock** and concurrency tests.
- Found and patched a **SQL injection vulnerability** with parameterized queries; hardened media sharing, user permissions, and **file-upload validation** to keep internal content secure.
- Replaced legacy PHP-rendered widgets with **Go API endpoints and reactive Vue components**, improving maintainability and user experience.
- Diagnose and fix complex, environment-specific bugs; deliver through **Kubernetes** GitOps pipelines with code review and **AODA/WCAG-compliant** UI.

Founding Software Engineer | React, Node.js, TypeScript, Firebase, Stripe

Sep 2025 – Present

Vironix AI

Toronto, ON

- Architected core backend of an **AI video analytics platform** with active users: Node.js API, Firestore, and **asynchronous workers** integrating Google Cloud Video Intelligence, AssemblyAI, and LLMs to generate scores, timelines, and recommendations.
- Built **credit-based usage billing** with **transactional** deductions, **idempotent** refunds, and **Stripe** subscriptions and webhooks, informed by unit-economics analysis of AI and infrastructure costs.
- Developed the **React/TypeScript** dashboard for authentication, video uploads, analytics visualization, and billing management.
- Added **rate limiting**, authorization, signed-URL storage access, and **CI/CD** (GitHub Actions) to keep the platform secure and reliable in production.
- **Interviewed 50+ engineering candidates** and helped hire the engineering team; contributed to product, pricing, and financial planning decisions.

Freelance Software Engineer | Python, React, TypeScript, Selenium

May 2024 – Present

Independent Contractor

Toronto, ON

- Built a paid **web-automation and SMS alert service** (Selenium, Twilio) used by **20+ students** across **40+ courses**, sending **150+ alerts** at **>90% success** with automated retries and duplicate suppression.
- Built an **AI-powered data pipeline** (Python, OpenAI GPT) for a paid client, classifying **500+ listings** per run at **>95% accuracy** and cutting candidate listings by **~40%**.
- Delivered a booking and quote website for JTC Property Services, generating **50+ bookings** in 3 months with **99.9% uptime**.
- Built the React/TypeScript website and booking system for Little Genius Island, a business earning **tens of thousands of dollars monthly**, streamlining lead intake and scheduling.

EDUCATION

Toronto Metropolitan University

Sep 2023 – Present

BSc, Computer Science, Co-op – Dean's List

Toronto, ON
